**IS YOUR COMPUTER STILL RUNING WINDOWS 10?**

**Microsoft will end support for Windows 10 on October 14, 2025.**

After this date, Microsoft will officially end support for Windows 10. This means no more free software updates, security patches, or technical support through Windows Update.

Although PCs running Windows 10 will continue to operate, they will face increased risks from viruses and malware without ongoing updates. To stay secure and protected, Microsoft advises upgrading to the latest version of Windows, which ensures access to critical updates and technical support.

**Key Risks of Staying with Windows 10:**

- No more security updates, increasing vulnerability to viruses and malware.
- Limited technical support from Microsoft.
- Compatibility issues with new software and hardware.
- Reduced performance and outdated features over time.

**Benefits of Upgrading to Windows 11:**

- Regular security updates to protect against modern threats.
- Enhanced performance and system reliability.
- Access to the latest features and productivity tools.
- Improved compatibility with modern software and hardware.

To keep your devices secure and up to date, consider upgrading to Windows 11 before support for Windows 10 ends. **Contact us** for more information.

**Mon-Fri 9.00am-5pm Sat 9.30am-4.30pm\***
